

## Provincial Forecast for Saskatchewan

November 2011

NORTH SASKATCHEWAN RIVER			
Month	Mean Flow at Prince Albert (m <sup>3</sup> /s)		
	Low <sup>1/</sup> Estimate	Best Estimate	High Estimate
November	100	120	150
December	80	100	140
January	80	100	120
February	90	120	130
March	90	120	140
April	270	340	410

The total inflow forecast <sup>2/</sup> for the November to April period is:  
 Low Estimate = 1.9 x 10<sup>6</sup> dam<sup>3</sup> or 80% of normal.<sup>3/</sup>  
 Best Estimate = 2.3 x 10<sup>6</sup> dam<sup>3</sup> or 100% of normal.<sup>3/</sup>  
 High Estimate = 2.8 x 10<sup>6</sup> dam<sup>3</sup> or 120% of normal.<sup>3/</sup>

<sup>1/</sup> Low and high estimates are based on lower and upper quartile precipitation, respectively.  
<sup>2/</sup> Inflow forecasts are expressed in cubic decametres (dam<sup>3</sup>).  
<sup>3/</sup> Normal November to April inflow at Prince Albert (assuming normal Alberta uses) is 2.4 x 10<sup>6</sup> dam<sup>3</sup>.
