7	400	346.96	500	313.50	500

HYD 66

Note: This forecast is based on declared SaskPower operations at the time of issue. It also relies upon data which contains inherent uncertainties. As with all forecasts, uncertainties in the estimates increase as you move further away from the date of issue.

*Tobin Lake outflows may not correspond with flows reported downstream of the dam by Environment Canada but reflect what SaskPower is anticipating their calculated outflows to be over this period.
